

# soft starter-ATS22control 220V-power 230V(90kW)/400...440V(160kW)

ATS22C32Q

## Main

| Range of product             | Altistart 22  |
|------------------------------|---|
| Product or component type    | Soft starter  |
| Product destination          | Asynchronous motors   |
| Product specific application | Pumps and fans  |
| Component name               | ATS22   |
| Network number of phases     | 3 phases  |
| [Us] rated supply voltage    | 230440 V - 1510 %   |
| Motor power kW               | 160 kW 400 V<br>160 kW 440 V<br>90 kW 230 V                             |
| Factory setting current      | 285 A   |
| Power dissipation in W       | 150 W for standard applications   |
| Utilisation category         | AC-53A  |
| Type of start                | Start with torque control (current limited to 3.5 ln)                   |
| IcL starter rating           | 320 A for connection in the motor supply line for standard applications |
| IP degree of protection      | IP00  |

### Complementary

| Assembly style               | With heat sink  |
|------------------------------|---|
| Function available           | Internal bypass   |
| Supply voltage limits        | 195484 V  |
| Supply frequency             | 5060 Hz - 1010 %  |
| Network frequency            | 4566 Hz   |
| Device connection            | To the motor delta terminals In the motor supply line   |
| [Uc] control circuit voltage | 230 V - 1510 % 50/60 Hz   |
| Control circuit consumption  | 20 W  |
| Discrete output number       | 2   |
| Discrete output type         | Relay outputs R1 230 V running, alarm, trip, stopped, not stopped, starting, ready C/O Relay outputs R2 230 V running, alarm, trip, stopped, not stopped, starting, ready C/O |
| Minimum switching current    | 100 mA at 12 V DC (relay outputs)   |

Mounting and Clearance

#### **Precautions**

#### **Standards**

The Altistart 22 soft starter is compliant with pollution Degree 2 as defined in NEMA ICS1-1 or IEC 60664-1.

For environment pollution degree 3, install the Altistart 22 soft starter inside a cabinet type 12 or IP54.

#### **A** DANGER

HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH

ATS22 soft starters are open devices and must be mounted in a suitable enclosure.

Failure to follow these instructions will result in death or serious injury.

#### **Air Circulation**

Leave sufficient free space to help the air required for cooling purposes to circulate from the bottom to the top of the unit.

#### Overheating

To avoid the soft starter to overheat, respect the following recommendations:

- Mount the Altistart 22 Soft Starter within ± 10° of vertical.
- Do not locate the Altistart 22 Soft Starter near heat radiating elements.
- Electrical current through the Altistart 22 Soft Starter will result in heat losses that must be dissipated into the ambient air immediately surrounding the
- If several soft starters are installed in a control panel, arrange them in a row. Do not stack soft starters. Heat generated from the bottom soft starter ca

## ATS22C32Q

Connections and Schema

#### Connection in the motor delta winding in series with each winding

#### Wiring

ATS22 soft starters connected to motors with the delta connections can be inserted in series in the motor windings.

The following wiring requieres particular attention. It is documented in the Altistart 22 Soft start - soft stop unit user manual. Please contact Schneider Electric commercial organisation for further informations.

#### Example

A 400 V - 110 kW motor with a line current of 195 A (nominal current for the delta connection). The current in each winding is equal to 195/1.5 or 130 A. The rating is determined by selecting the soft starter with a permanent nominal current (ICL) just above this current.
